

Cisco SPA 509G

Device overview

With hundreds of features and configurable service parameters, the Cisco SPA 509G addresses the requirements of traditional business users while building on the advantages of IP telephony.

The Cisco SPA 509G is a MiCall Auto-Provisioning device, using HTTPS/SSL to secure configuration information between the user and service provider. This provides a highly secure mechanism for the service provider to remotely manage the phone/user configuration and the device software upgrades.

Highlights

- Full-featured twelve-line business-class IP phone supporting Power over Ethernet (PoE)
- Connects directly to an Internet telephone service provider or to an IP private branch exchange (PBX)
- Easy installation and highly secure remote provisioning, as well as menu-based and web-based configuration
- Wideband audio for unsurpassed voice clarity and enhanced speaker quality
- Supports up to two Cisco SPA 500S Expansion Modules, allowing an additional 64 buttons
- Two 10/100BASE-T RJ-45 Ethernet ports
- Pixel-based display; 128 x 64px monochrome LCD graphical display with backlight
