

Polycom Soundpoint 450

Device overview

The SoundPoint IP 450 is a desktop phone designed to bring advanced telephony features and applications to office workers handling a moderate volume of calls. With its high-resolution, graphical backlit display, dual-port 10/100 Ethernet Switch and Polycom HD Voice, the SoundPoint 450 sets new standards for the mid-range SIP desktop phone.

Highlights and key features

- Full-featured enterprise level business-class IP phone with three lines
- HTTPS secure provisioning
- Integrated PoE support (IEEE 802.af)
- Polycom HD Voice
- 256 x 116 pixel backlit grayscale graphical LCD
- Seventeen dedicated hard keys, three context-sensitive soft keys
- Certified SIP call control
- Dedicated RJ-9 headset port

Feature overview

Unsurpassed voice quality and clarity – The SoundPoint 450 features Polycom HD Voice, bringing life-like richness and clarity to every call. Polycom HD Voice incorporates wideband audio for over twice the voice clarity; the patented Acoustic Clarity Technology provides crystal clear, echo-free sound plus best-in-class system design for high-fidelity voice reproduction.

Efficient installation – The SoundPoint 450 phones are engineered to make installation, configuration and upgrades as simple and efficient as possible. Built-in IEEE 802.3af PoE circuitry and a dual port Ethernet switch enable flexible deployment options and savings on cabling expenses.

Enterprise-grade feature set – The SoundPoint 450 delivers an intuitive user interface through a full feature set encompassing traditional business telephony features such as call hold, park, pick-up, transfer and three-way local conferencing, as well as more advanced capabilities such as Shared Call Appearance and Call Control Toolbar Integration.

Secure provisioning – The SoundPoint 450 provides encrypted provisioning information using HTTPS to secure communication between the user and the service provider. The secure remote provisioning software provides a highly secure mechanism for configuration and the device software upgrades.
