

Polycom VVX 1500 IP Video Phone

Device overview

The Polycom VVX 1500 brings together MiCall voice, video and applications into a simple-to-use business media phone, featuring unique touch-screen interface that makes video-calling as easy as picking up the handset.

The large, easy to use display makes the VVX 1500 the ideal all-in-one tool for busy executives and professionals in all working environments and has multiple adjustable elements such as camera tilt, base height and screen angle to suit each user's preferences.

The integrated camera delivers business-grade video, making personalised eye-to-eye visual communications simple and cutting down the need for travel costs.

Whether used as a primary phone, additional line or additional device, Shared Call Appearance includes the option for a SIP Trunk Mobility user to use the Polycom VVX 1500 as an additional device for video calling.

Other features include extension dialing, conference calling, speakerphone, RJ-9 headset port and voicemail integration.

Highlights and key features

- Up to six accounts (registrations) with MiCall Application Integration
- Seven inch colour LCD touch screen
- HTTPS secure
- Remote automatic provisioning
- HD Voice G722, G711 and G729 supported
- Industry-standard H.264 codec and CIF (352x288) resolution On-Net video calling
- Automatic Busy Lamp Field integration
- Two 10/100/1000 Base-TX ports for LAN and PC
- Eco-friendly – low power consumption/travel costs

Plug-and-play secure provisioning

The Polycom VVX 1500 is a MiCall Auto-Provisioning device, which uses HTTPS/SSL to secure configuration information between the user and service provider. This provides a highly secure mechanism for the service provider to remotely manage the phone/user configuration.
